

Global Network

Epson established its first overseas manufacturing site in 1968, in Singapore. Today, Epson has production and R&D sites in 29 locations around the globe to allow it to accurately identify, and then swiftly and flexibly meet the needs of customers at different times and in different regions. Epson, a customer-focused company that considers the quality of its products and services to be a top priority, also has sales and service sites in 64 locations around the world.
