

32-bit Single Chip Microcomputer

- 32-bit S1C33000 RISC Core
- Low Power Consumption
- Multiply Accumulation
- Built-in 8K-byte RAM
- 10-bit ADC
- 4-ch. SIO
- High-speed DMA, Intelligent DMA

■ DESCRIPTION

The S1C33301 is a Seiko Epson original 32-bit microcomputer. It features high speed, low power consumption, and low-voltage operation, and is ideal for portable products that require high-speed data processing. The S1C33301 consists of an S1C33000 32-bit RISC type CPU as its core, peripheral circuits including a bus control unit, DMA controller, interrupt controller, timers, serial interface with FIFO, A/D converter, and SmartMedia interface, and also RAM. A high-speed oscillation circuit, PLL, and a low-speed oscillation circuit are also included, supporting advanced operation, power-saving operation, and high-performance realtime clock functions. Use of the internal MAC (multiplication and accumulation) function in combination with the A/D converter also facilitates the design of systems requiring DSP functions, such as speech recognition and synthesis applications.

■ FEATURES

- CMOS LSI 32-bit parallel processing S1C33000 RISC Core
- Main clock 50MHz (Max., up to 33MHz external clock input)
- Sub clock 32.768kHz (Typ., crystal)
- Instruction set 16-bit fixed length, 105 instructions
(MAC instruction is included, 2 cycles)
- Internal RAM size 8,192 bytes
- Clock timer 1 channel
- Programmable timer 8 bits × 6 channels and 16 bits × 6 channels
- Watchdog timer Realized with a 16-bit programmable timer
- Serial interface 4 channels
Clock synchronization type and asynchronization type are selectable. Usable as an infrared ray (IrDA) interface.
Ch.0 is selectable between a built-in buffer type (a 4 bytes of receive-data buffer and a 2 bytes of transmit-data buffer) and no buffer type.
- SmartMedia interface 1 channel
Allows direct connection of a SmartMedia
- 10-bit A/D converter Successive approximation type
8 input channels (QFP15-128pin)
4 input channels (PFBGA-121pin)
- High-speed DMA 4 channels
- Intelligent DMA 128 channels
- I/O port Input port : 13 bits (QFP15-128pin)
9 bits (PFBGA-121pin)
I/O port : 47 bits (QFP15-128pin)
44 bits (PFBGA-121pin)
- Interrupt controller External interrupts : 10 types
Internal interrupts : 40 types

S1C33301

- External bus interface 26-bit address bus, 16-bit data bus, 7 chip enable pins
SRAM and Burst ROM may be connected directly.
- Shipping form QFP15-128pin, PFBGA-121pin
- Supply voltage Core voltage : 1.65 to 1.95V (1.8±0.15V)
I/O voltage : 2.70 to 3.60V (3.0/3.3±0.3V)
- Power consumption SLEEP state : 5.4µW (1.8V, 50MHz)
RUN state : 40mW (1.8V, 50MHz)
