

# M-G364PD

## High Stability IMU (Inertial Measurement Unit)

### ■ GENERAL DESCRIPTION

The M-G364PD is a small form factor inertial measurement unit (IMU) with 6 degrees of freedom: triaxial angular rates and linear accelerations, and provides high-stability and high-precision measurement capabilities with the use of high-precision compensation technology. A variety of calibration parameters are stored in memory of the IMU, and are automatically reflected in the measurement data being sent to the application after the power of the IMU is turned on. With a general-purpose SPI/UART supported for host communication, the M-G364PD reduces technical barriers for users to introduce inertial measurement and minimizes design resources to implement inertial movement analysis and control applications.

The features of the IMU such as high stability, high precision, and small size make it easy to create and differentiate applications in various fields of industrial systems.

### ■ FEATURES

- Small Size, Lightweight : 24x24x10mm<sup>3</sup>, 10g
- Rugged Metal Body / High Vibration Resistance
- Low-Noise, High-stability
  - Gyro Bias Instability : 2.2 °/h
  - Angular Random Walk : 0.09 °/√h
- Initial Bias Error : 360 °/h
- 6 Degrees Of Freedom
  - Triple Gyroscopes : ±100 / ±200 °/s \*
  - Tri-Axis Accelerometer : ±3 G
- 16/32bit Data Resolution
- Digital Serial Interface : SPI / UART
- Calibrated Stability (Bias, Scale Factor, Axial alignment)
- Data Output Rate : to 2k Sps
- External Trigger Input / External Counter Reset Input
- Calibration Temperature Range : -40°C to +85°C
- Operating Temperature Range : -40°C to +85°C
- Single Voltage Supply : 3.3 V
- Low Power Consumption : 18mA (Typ.)

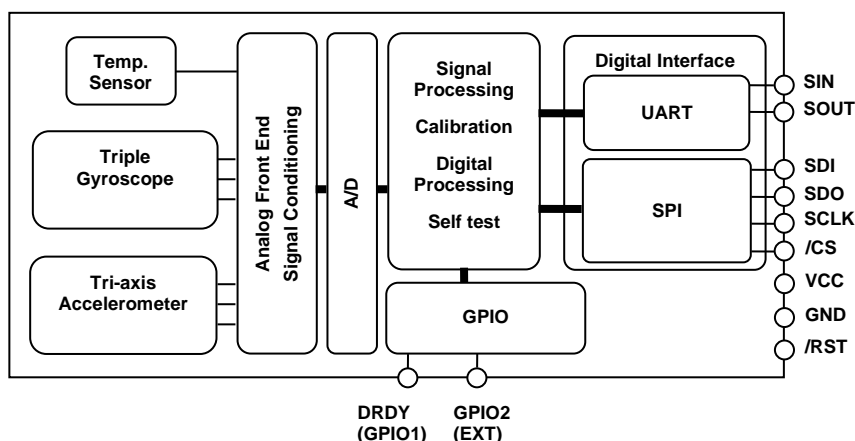

\*The gyro dynamic range is determined by part number ordering code

### ■ APPLICATIONS

- Antenna and Platform Stabilization
- Camera Gimbals
- Motion Analysis and Control
- Navigation Systems
- Vibration Control and Stabilization
- Pointing and Tracking Systems

\*1) This is a reference value used for internal temperature compensation. We provide no guarantee that the value gives an absolute value of the internal temperature.

\*2) This is the temperature scale factor for the upper 16bit (**TEMP\_HIGH**).

\*3) The parameter is fixed and determined by part number option selected at the time of order.

Note) The values in the specifications are based on the data calibrated at the factory. The values may change according to the way the product is used.

Note) The Typ values in the specifications are average values or 1σ values.

Note) Unless otherwise noted, the Max / Min values in the specifications are design values or Max / Min values at the factory tests.

7. Epson products have been designed, developed and manufactured to be used in general electronic applications (office equipment, communications equipment, measuring instruments, home electronics, etc.) and applications individually listed in this document ("General Purpose"). Epson products are NOT intended for any use beyond the General Purpose that requires particular/higher quality or reliability in order to refrain from causing any malfunction or failure leading to harm to life, health or serious property damage or severe impact on society, including, but not limited to listed below. Therefore, you are advised to use Epson products only for the General Purpose. Should you desire to buy and use Epson products for the particular purpose other than the General Purpose, Epson makes no warranty and disclaims with respect to Epson products, whether express or implied, including without limitation any implied warranty of merchantability or fitness for any particular purpose.  
    【Particular purpose】  
    Space equipment (artificial satellites, rockets, etc.)  
    Transportation vehicles and their control equipment (automobiles, aircraft, trains, ships, etc.)  
    Medical equipment (other than applications individually listed in this document) / Relay equipment to be placed on sea floor  
    Power station control equipment / Disaster or crime prevention equipment / Traffic control equipment / Financial equipment  
    Other applications requiring similar levels of reliability as the above
8. Epson products listed in this document and our associated technologies shall not be used in any equipment or systems that laws and regulations in Japan or any other countries prohibit to manufacture, use or sell. Furthermore, Epson products and our associated technologies shall not be used for developing military weapons of mass destruction, military purpose use, or any other military applications. If exporting Epson products or our associated technologies, you shall comply with the Foreign Exchange and Foreign Trade Control Act in Japan, Export Administration Regulations in the U.S.A (EAR) and other export-related laws and regulations in Japan and any other countries and follow the required procedures as provided by the relevant laws and regulations.
9. Epson assumes no responsibility for any damages (whether direct or indirect) caused by or in relation with your non-compliance with the terms and conditions in this document.
